Arjan Langerak

Sprint goal

Sprint backlog

User Story	Task	Assigned to	Estimated effort
As a user I want to have more overview so I want to zoom	graph zoom(non semantic) scaling nodes drawing correct buckets	Arjan	1d
As a user I want to be able to see as much interesting information as possible	“interestingness” score calculations for nodes, based on client description.	Joren	1d
	Zooming chains of nodes	Rutger	4h
	Zooming (relatively) small nodes together.	Rutger	4h
	Zoomed out state of graph stacked mutation quantity diagram)	Jos	1d
	Generating a stacked mutation quantity diagram from the bucketcache and make those mergeable so we have the first zoom levels	Jos	1d
	Remove the need for a vertical scrollbar in the graph view. This will make zooming using the scroll-wheel possible.	Arjan	1d
	Improve the sequence view to a table	Joren	1d
As a user I want to be able to scroll over the graph smoothly so that I can quickly navigate it.	Remove (or make it a setting) the edge drawing.	Joren	1h
	make the tree automatically scale to use the available space	Albert	4h
	make the color scheme of the tree better	Albert	4h
As a user I want the software to be maintainable so that new features can be implemented with ease after release.	Maven modules	Rutger	1d
As a user I want to have reliable software	increase test coverage to >75%	Everyone	

	Make the tree more usable with larger trees (do not render text for tiny nodes, make tiny nodes unclickable, balance the tree before rendering)	Albert	4h
